

NTT Digital and Xangle Reach Basic Agreement for the Social Implementation of Cutting-Edge Digital Technologies

— Providing Comprehensive Support from Both Companies as a Launchpad for Global web3 Business Expansion —

Tokyo, Japan, September 2, 2024 --- NTT Digital, Inc. ("NTT Digital") and CrossAngle, Inc. ("Xangle") announced today that they have reached a basic agreement to collaborate on the social implementation of cutting-edge digital technologies by leveraging their respective business assets. Through broad support that utilizes the networks, market insights, and infrastructure technologies of both Japan and South Korea, the companies aim to expand global business opportunities for corporations and create new use cases.

Background and Objectives

To achieve the social implementation of the latest digital technologies, including blockchain, creating global use cases is essential. In South Korea, many users are already engaging with digital assets such as NFTs, and companies are increasingly adopting blockchain technology. To enhance cross-border business opportunities, it is crucial to understand the characteristics of the business environment and the needs of customers, and to offer services that leverage reliable infrastructure. By providing one-stop support, NTT Digital and Xangle aim to create new business opportunities together with their partner companies.

Global Business Support Initiatives

To establish an environment that enables global business expansion, NTT Digital and Xangle will jointly support the business development of their partner companies by leveraging their insights and networks in the Japanese and Korean markets. Xangle will provide ERP services capable of analyzing on-chain data related to finance and marketing, supporting the formulation of cost-effective, data-driven strategies. NTT Digital will provide infrastructure technologies, including the "scramberry WALLET SUITE," a service that offers essential digitalization functions such as digital wallets through APIs and SDKs, as well as the "Node Provider/Indexer Service," which facilitates the reading and writing of information on the blockchain.

As the first step in this collaboration, the companies will focus on creating use cases in the entertainment industry and fan community services. They will also begin discussions on providing more seamless solutions by combining their respective technologies.

Through this initiative, NTT Digital and Xangle will accelerate the social implementation of advanced technologies, including blockchain, and open up new business opportunities.

Official Website: <https://business.xangle.io/>

Xangle, Korea's Web3 Solution company running Korea's largest market intelligence platform dedicated to driving the mass adoption of Web3, provides comprehensive tools to support enterprises exploring opportunities in this space. Our goal is to create real Web3 use cases by helping large enterprises and Web3 foundations navigate complex regulations and build data-driven strategies. As a global solutions provider, Xangle collaborates with experts like Bain & Company on strategy, KPMG on compliance, and NTT Digital on Japan's Web3 initiatives, while continuing to strengthen its presence through diverse sales channels both domestically and internationally.
