

Blockchain Games Become More Accessible with Secure and User-Friendly Digital Wallet Features—NTT Digital and GMO Media Sign a Basic Agreement on the Introduction of the "scramberry WALLET SUITE"

Tokyo, Japan, September 25, 2024 --- NTT Digital, Inc. ("NTT Digital") and GMO Media, Inc. ("GMO Media") have signed a basic agreement to introduce NTT Digital's "scramberry WALLET SUITE" into the browser game platform "Gesoten by GMO," operated by GMO Media, with the aim of co-creating use cases for blockchain games.

Background and Objectives

NTT Digital aims to create a secure digital environment accessible to everyone by offering digital wallet functions and more through the "scramberry WALLET SUITE," provided as APIs and SDKs. GMO Media operates a game platform compatible with blockchain, under the concept of "simple," "secure," and "fun." Their need for a wallet service that allows users without Web3 knowledge to use it easily and securely aligned with the features of the "scramberry WALLET SUITE," leading to the signing of the basic agreement.

For more details about the scramberry WALLET SUITE, please refer to the following link:

Goals of the Collaboration

"Gesoten by GMO," operated by GMO Media, a member of the GMO Internet Group since July 2012, is a browser game platform that allows users to play online games for free. In December 2023, GMO Media launched "Blockchain Game PARK," where users can earn cryptocurrency and NFTs by playing existing games and using affiliated services within "Gesoten by GMO." In the future, players will also be able to buy and sell in-game characters and items.

However, until now, users needed to set up their own digital wallets to play on "Blockchain Game PARK," which presented a barrier for those unfamiliar with blockchain technology. By integrating the "scramberry WALLET SUITE" into the service, wallet functionality can be provided while maintaining the existing UI/UX, allowing users to easily manage the cryptocurrency and NFTs they earn through the games. Additionally, thanks to the latest security measures and proprietary encryption technology built into the "scramberry WALLET SUITE," users can enjoy a highly secure and reliable service.

NTT Digital will collaborate with GMO Media to create an environment where more users can safely and easily enjoy blockchain games.

Company overview

NTT Digital, Inc.

Address: 10th Floor, Sanno Park Tower, 2-11-1 Nagata-cho, Chiyoda-ku, Tokyo
Official website: <https://nttdigital.io>

As a web3 enabler, NTT Digital, Inc. will promote the creation of an environment in which individuals and companies can easily and safely use blockchain technology toward the social implementation of cutting-edge digital technologies.

PRESS RELEASE

GMO Media, Inc.

Address: Cerulean Tower, 26-1 Sakuragaoka-cho, Shibuya-ku, Tokyo

Official Website: <https://www.gmo.media>

Since its founding, GMO Media has focused on developing and operating its own media services on the internet. Currently, in addition to fostering two major businesses—the programming education portal "Koeteko by GMO" and the beauty and medical information platform "Kireipass by GMO"—the company also operates game platforms and point-based websites, catering to users who are highly responsive to point incentives like "poikatsu" (point collection activities).
